Profile

A front-end developer with over 7 years of experience. I've worked with startups like Bounce, Healthcaremagi and GlowRoad.

I was also a part of a racing team and was successfully able to bring together a bunch of petrol heads. I have raced bikes, won trophies, have put in considerably high number of playtime in Dota2 and CountreStrike , started a youtube channel and screwed it up and countless more endeavors that list could take a while.

With a strong emphasis on "Progressive Enhancement", I look for creative ways to push the boundaries of website front-end code without compromising on browser support and performance.
